SOFI TUKKER SHARES COVER OF SNOW PATROL'S "CHASING CARS"

ULTRA MUSIC ([HTTP://WWW.ULTRAMUSIC.COM/](http://www.ultramusic.com/))

SOFI TUKKER are ending their meteoric year with the release of their cover of Snow Patrol's classic "Chasing Cars". The duo recasts the song as a vulnerable duet that waxes and wanes, echoing intimate conversations. The band share about the song, "Chasing Cars is a song we both bonded over. It depicts that state... of being intimate with someone, of forgetting the whole world exists, when you're together. The lyrics couldn't be more perfect. The two opening notes are iconic. We still can't believe we even dared to touch it... it's such a masterpiece already. Tuck doesn't usually volunteer to sing, but there's probably no other song he's sung more in his life. So he was comfy enough to give it a go. We first made it to perform on Triple J, an Australian radio station, and then we realized it's the perfect way to wrap up an amazing year. Last week marked 1000 days since the Freak Fam started, the community that built around the livestream DJ sets we did during the pandemic. We hope it pulls at the heartstrings of people who once listened to this song the way we did, and maybe it'll introduce some people to the song altogether, in which case... you're welcome. We feel lucky to have been able to have fun with it. Thank you Snow Patrol for writing one of our favorite songs ever." Listen to it here and watch the visualizer, and check out the [Triple J live performance](#)

The group's areas of focus will include brand growth and strategy, rainforest conservation initiatives, product development and innovation, and content creation. Novo Fogo is a carbon-negative company and the only independent craft cachaça brand to wholly own its distillery and sugarcane fields. With a distillery located in the heart of Brazil's coastal rainforest, conservation is a core principle of Novo Fogo's mission. SOFI TUKKER's partnership with Novo Fogo will allow the duo to directly participate in conservation initiatives like *The Un-Endangered Forest*™, the company's reforestation project in Brazil to save 36 species of trees from extinction.

In celebration of the partnership, the group says, "We have a lot in common with Novo Fogo – we share a core love of Brazil, fun, and environmentalism. Cachaça is Tuck's favorite drink and Soph doesn't drink alcohol, but she's still at the same party... both having the best time. This partnership works because Novo Fogo is so much more than cachaça and spirits; they are a powerful rainforest preservation steward, and we're enthusiastic participants in the reforestation project *The Un-Endangered Forest*. So if you do decide to drink, we hope you'll drink Novo Fogo because you'll be planting trees in the Brazilian rainforest at the same time! We're excited to help introduce this classic Brazilian drink to more people around the world."
